

Cheat Sheet for Scrappy Bricks Quilt

You may use yardage, fat quarters or yardage for this quilt. The more fabrics you use, the better it is! For planning purposes you can cut 6 bricks from a 3½" x WOF (usually about 42 usable inches) strip. Each fat quarter will yield 15 bricks.

All full-size bricks are cut 3½" x 6½". Half bricks are cut 3½" x 3½".

"A" rows have full bricks and "B" rows have full bricks with a half brick on both ends.

Construction is simple. Just sew bricks together in rows. Alternate A and B rows, starting and ending with A rows. After all bricks are sewn into rows, sew the rows together. **IMPORTANT:** in order to keep the quilt straight, you need to sew rows onto the top in alternating directions (anti-directional sewing). For example, when sewing rows 1 and 2 together, start on the right side, then when you sew row 3, start on the left. Then when you add row 4, again start on the right and continue alternating until all rows are sewn together.

Baby Quilt: 42" x 51" 17 rows
94 full bricks and 16 half bricks
9 A rows with 6 full bricks
8 B rows with 5 full bricks and 2 half bricks

Lap Quilt: 54" x 69" 23 rows
196 full bricks and 22 half bricks
12 A rows with 9 full bricks
11 B rows with 8 full bricks and 2 half bricks

Twin Quilt: 60" x 87" 29 rows
276 full bricks and 28 half bricks
15 A rows with 10 full bricks
14 B rows with 9 full bricks and 2 half bricks

Full/Queen Quilt: 84" x 99" 33 rows
446 full bricks and 32 half bricks
17 A rows with 14 full bricks
16 B rows with 13 full bricks and 2 half bricks

King Quilt: 108" x 105" 35 rows
613 full bricks and 34 half bricks
18 A Rows with 18 full bricks
17 B Rows with 17 full bricks and 2 half bricks

The diagram shows the layout for the lap size quilt. This is a great project for using up scraps. It makes a wonderful donation quilt!
